

# PRESS RELEASE

30 MARCH 2017

## LEMAN invests in top modern transport system

### MUCH EASIER - AND MORE VALUE FOR THE CUSTOMER

LEMAN invests in a new and future-proof Transportation Management System, which is expected to be implemented in the entire LEMAN Group in mid-2018.

The choice fell on the recognized system, CarLo, from the German supplier Solo-plan. CarLo fully supports LEMAN's requirements to facilitate worklife with faster processes, and the system also provides the customer with better access to LEMAN's many services and solutions throughout the entire supply chain.

"The investment is an important step towards a more efficient and digital presence, which creates valuable solutions for our customers," says Kasper T. Davidsen, Group CIO, who has already made a significant mark on the digital future of LEMAN.

### NEW AND TOP MODERN

With the new transport system, LEMAN's customers will experience an easier and more integrated operation, improving the cooperation and lead to significant efficiency results.

"Our customers will benefit from our hard work to be the most flexible and reliable all-round supplier of transport and logistics - in line with our profitable growth strategy," says Thomas Krøyer, Group CEO at LEMAN, adding that customers can look forward to the new and top modern transport system.

### ABOUT LEMAN

LEMAN is a well-known Danish transport and logistics company with over 115 years of experience and history. LEMAN currently provides state-of-the-art logistics, warehousing, and customized pharma solutions. The company employs over 700 employees at its headquarters in Denmark and in Sweden, Norway, Finland, United Kingdom and the United States.
